EDUCATION

University of York

2024 – 2025

MSc in Artificial Intelligence (Distinction)

York, United Kingdom

- Dissertation: *Clean2Green: Diffusion-Based Neural Rendering for Green-Screen Relighting and Composite Correction*.

University of York

2017 – 2021

BEng Computer Science with a Year in Industry

York, United Kingdom

PUBLICATIONS

- Prince Odion, William A. P. Smith, James Gardner, Florian Block. *Clean2Green: A Diffusion-Based Pipeline for Green-Screen Correction* — currently under review for CVPR 2026.

RESEARCH EXPERIENCE

Research Associate

Jan 2026 – Present

PXLD & Dock10 Studios (University of York Spin-out)

York, United Kingdom

- Leading research on neural relighting and compositing for realistic video synthesis, advancing state-of-the-art generative models for visual effects.
- Developing and evaluating deep learning models for physically grounded scene understanding and appearance manipulation
- Collaborating with Dock10 Studios to integrate research outputs into a production pipeline for an upcoming television release, bridging academic and industry applications.
- Designing high-performance data processing and training pipelines, conducting distributed experiments on HPC clusters to optimise efficiency and scalability.

Student Research Partner

Mar 2025 - Sep 2025

University of York

York, United Kingdom

- Collaborated with four departments in the Faculty of Science to create a digital toolkit for decolonising and diversifying the curriculum.
- Conducted literature reviews, focus groups, and workshops to gather quantitative and qualitative data on curriculum inclusivity.
- Analysed findings to identify gaps and opportunities for fostering more inclusive learning communities.
- Supported the launch and dissemination of the toolkit, facilitating discussions to promote institutional change.

INDUSTRY EXPERIENCE

Software Engineer

2021 – 2024

PokerStars (Flutter International)

Leeds, United Kingdom

- Specialised in iOS development and TypeScript; contributed to high-impact features such as Bet Builder (£20M revenue during World Cup 2022).
- Managed international release migrations (Italy, France, Germany), ensuring compliance with local regulations and seamless UX through adaptive logic, translations, and locale-based formatting.
- Mentored junior developers and collaborated with cross-functional teams on international app releases.

Mobile Engineer

Jul 2019 – Jan 2021

Zivato

Leeds, United Kingdom

- Developed and maintained cross-platform mobile applications and backend infrastructures for multiple clients using Swift, Java, and TypeScript.
- Designed backend APIs and services ensuring scalability, reliability, and seamless integration across iOS and Android platforms.
- Collaborated with diverse stakeholders—including product managers, designers, and clients—to translate business requirements and wireframes into high-quality, maintainable solutions.
- Contributed to all stages of the mobile development lifecycle, from architectural planning and implementation to testing, deployment, and post-launch support.

AWARDS

- Awarded the Departmental Prize for the **Highest Performing Student** in the MSc Artificial Intelligence cohort 2024/25.
- Awarded the **highest mark for the MSc Artificial Intelligence thesis**, recognising excellence in original research and technical innovation.
